

Draw your key.

Get a sticker and a dark marker.

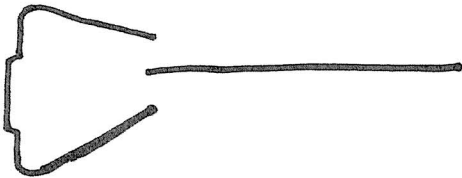

Notice the shape of just the top of the key. It might be a circle, an oval, a pentagon or another polygon.

Draw just the top of your key, bigger if you want.

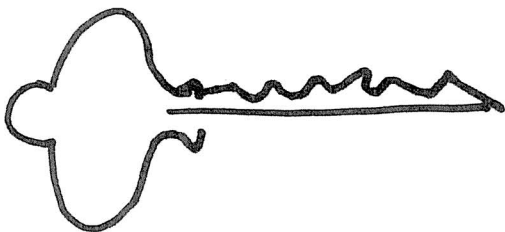

One type of key looks like lots of rectangles.

Many keys have a deep groove down the middle.

Draw this as a line.

Look closely at the bumps on your key. Draw what you see. These are just angled lines.

It does not have to be perfect. Really.
