

The bottom of the key is made of lines, straight, curved or angled.

Draw those lines.

Add the hole for the keychain, then get fancy with some dots and lines.

If you really just want to trace the key, try this.

Hold the Sharpie close to, **but not touching the key.**

Follow along the outside shape. When you finish, be sure to add the center groove and other details.

Please keep your key,  
help yourself to a keychain.
